

1. Website

The skeleton is done and I have begun inputting the content. Changes to the layout and theme need to be made but it is taking shape and should be ready to replace the old one in the next few weeks. I haven't yet received all the Director profiles. There is going to be a section of Meet the People with profiles of five households to give site visitors an idea of the WH residents. All five have agreed and are drafting profiles.

2. Social Media

Still going well, with around two to three likes or followers each week.

3. Horgabost Pontoon & Shed

I am compiling quotes from seven shed manufacturers, based on standard measurements, with final choice depending on interested parties, budget and the Grazings, with whom we intend to meet soon to discuss the project. I have an updated quote from FusionMarine for the pontoon and am awaiting a quote from Specialist Welding Services, as well as more information from FusionMarine about a site visit and seabed survey. LEADER is getting back to me within a month when more funding has become available and was very positive due to the immediacy of the project and the established benefit to the area.

4. Horticulture Group

Of the twenty three residents who initially expressed an interest, seven were able to attend the meeting on Tuesday January 15 to establish what everyone was interested in etc. The consensus was that a polytunnel would be preferred and I have been researching different ones as well as Keder houses, which can withstand up to 130 mile winds and have a 10 year guaranteed lifespan. Fiona Toor is helping with the cost estimates for the application.

5. Beach Festival

Planning is well underway.

6. Friends of WH

A year's membership (£20) came in on Wednesday along with a donation of £5.
