

24 September, 2013

1. Social Media

Still going well, great for spreading information. Facebook now has 399 'likes' and Twitter has 197 followers.

2. Horgabost Marine Project

The pontoon has been installed! Construction began on 10 September and was completed on 14 September. The pontoon will be in the water through October. A press release has been sent out to local news sources and a page on the website is being drafted.

Moorings in the sound of Taransay and the creation of a Moorings Association to facilitate this is being researched.

All quotes regarding the shed, construction of the shed and ground work for the shed have been received.

3. Beach Festival 2014

Enquiries to several bands have been made to gauge availability and price. I spoke to the Kite Club of Scotland regarding a kite flying demo and kitemaking workshops. Other attractions such as a bouncy castle and a pig are under consideration.

As a committee will be taking over planning of the festival, members should be identified as soon as possible.

4. Seilebost School Feasibility

I've started a first draft of a feasibility brief to investigate the possible uses for Seilebost School community ownership.
